Photoshop Assignment:

"Change the Context of the School"

This tutorial will allow you to work with/on:

• Selection methods
• Compositing multiple photos
• Editing photographs
• Unleashing creativity

For this assignment you will create an image that *Changes the Context of High School*. Use a photograph of a typical high school environment and place (using Photoshop selection methods) something unexpected in each photo.

The image should...
    • Be a photograph taken at the high school with a digital camera
    • Have images added to the photographs to change the context of the photograph
      (can be pulled from Internet resources)
    • Be creative!

The point of this assignment is to attract attention by doing something unexpected. Take a setting we are use to seeing and change the context by adding something unexpected.

Turning the project in:
I.   Add your NAME in the image using the text tool
II.   Save a JPEG copy as Lastname_context.jpeg
III.   Drop the **JPEG** image in the **hand_in** folder on the **Photo server**
IV.   Upload it to your Blog and write a brief post about the project
